PSA – November 12, 2024

The San Carlos Housing Authority announces the intent to amend the Indian Community Development Housing Block Grant-American Rescue Plan (ICDBG-ARP). The amendment is proposed to include the construction and purchasing of housing units and to reduce the number of housing units for rehabilitation. The original intent of the ICDBG-ARP was to rehabilitate housing units throughout the San Carlos Apache Reservation. After a determination of the urgency to expend the ICDBG-ARP funds due to deadlines and through an analysis of an on-going construction project, the San Carlos Housing Authority determined that the ICDBG-ARP offers additional funding to complete the purchase of the modular units within the AZ-11-55D Project. Housing units will be available through AZ-11-55D to assist eligible families in overcrowding or homelessness situations for the prevention, preparation and response of the COVID-19. In addition, the amendment to the ICDBG-ARP will offer housing units to eligible families to reduce overcrowding for emergencies that constitute imminent threats to health and safety.

If additional information is requested, please contact Executive Director Martha Interpreter at (928) 475-2346 before November 27, 2024.
